TECHNICAL SKILL

- Languages - **C, Python, JavaScript**
- Technology - **Web Technology (HTML5, CSS, JavaScript, Tailwind, GSAP), Linux, Computer Network**
- Tools - **Vs Code, Git & GitHub, Postman, MS Office**

PROJECT

- E-Commerce Website(Awwward2)  | JAVASCRIPT & GSAP
*-Here in this application I tried to make a good UI e-commerce website for some game (any brand).
-Here I use html5,css,JavaScript, gsap,locomotive.js and a good template .
-This website is well animated, here I made a slider. When we click any of this , automatically the comment section as per the slide.
-Also added a E-mail section, where you can put your email.
-I have also added mouse pointer animation section, which can found in professional website*
- Game booking Website(Awwward-  | JAVASCRIPT & GSAP
*-Here in this application I tried to make a good UI e-commerce website for some product (any brand).
-Here I use html5,css,JavaScript, gsap,locomotive.js and a good template .
-Added some card section, having a good animation and smooth page merging , displaying a eye catch section
-I have also added mouse pointer animation section, which can found in professional website*
- Sales-report  | JSON
- In this site I created a sales report from a JSON file data, with a filter option. In which we can filter the report in the basis of product name, product id and product price.
- Weather-App  | API
-This is a Weather app , in which you can see the weather of any city. It includes CLOUD, HUMIDITY and PRESSURE
